**The Brody School of Medicine at East Carolina University, Greenville, NC**

Student researcher building and evaluating the use of custom neural networks (Python, Octave/MATLAB) as a machine learning approach to predicting outcomes in complex clinical cases in the emergency department, under the guidance of Dr. Kori Brewer, Ph.D. and Dr. Charles Brown, M.D. Project started during the M1 summer session as part of the Brody School of Medicine "Summer Scholars Student Research Program". Presented posters at the Brody School of Medicine Medical Student Research Day (2013), and the North Carolina Medical Society Scientific Poster Conference (2013). Primary author on a paper published in the American Journal of Emergency Medicine (2017).

**Researcher, Department of Computer Science**  
**Appalachian State University, Boone, NC**

Aug 2011 – Aug 2012

Recruited from within the CS department, along with two graduate students, to form a research team for building and evaluating the use of online, automatically-grading software systems for use in CS classes.
